Make sure that your old Mac has a computer name: Choose Apple menu  > System Preferences, then click Sharing and check the Computer Name field.. Find a new PC equipped with Lenovo Migration Assistant—or download the program directly.. When I go to the same website using an iMac, the download icon is visible Does anybody know why the download icon isn't showing or clickable on the Dell laptop? If this migration assistant doesn't work, is there another easy way to get some files, folders and photos onto the new MacBook Air? We are not computer experts so would appreciate help.. When I click on the PC

to Mac migration, a new page comes up but the icon is not available to click on and download the v2.. Install any updates for your third-party apps as well Make sure that your old Mac is using OS X Lion or later.. The migration assistant download icon is not showing on the Apple website when I use the PC.. Or connect them using target disk mode and the appropriate cable or adapter Then start up your old computer in target disk mode.. Download Apple Migration Assistant for Mac to fix an issue with the Migration Assistant application in Mac OS X Snow Leopard.. In those cases, we can migrate your email but can't move your local data (contacts/calendars/tasks, signatures and autocomplete cache). b0d43de27c [Atem Television Studio Software](#)
